

Pan Type Concrete Mixer

The efficient mixing of concrete is essential if quality specimens are to be manufactured. Pan Type Concrete Mixers are designed to give efficient mixing of both dry and wet materials.

The mixing pans are removable and tilts for easy access to the pan and emptying on completion of the mixing operation. The total volume of the pans are 100 liters but the effective capacity of the mixers are 56 liters.

The mixer head lifts clear to provide maximum access to the pan and holds the mixing blades at a constant depth during the mixing operation.

The blades can be adjusted to suit the different types and volume of materials to be mixed.

The pan type mixer is also equipped with rubber wheels which provide high portability.

All parts of the mixer are noncorrosive painted and galvanized.

Product Code	Dimensions	Weight	Power supply
PCO-224	95x100x120 cm	250 kg	50 Hz, 3 ph 380 V
